## Index to Volume 145

- A (see also Genes), 375
- Actin-binding protein molecules, structure in solution and interacting with actin filaments, 563
- Adenovirus DNA, structure of the link with 55,000 molecular weight terminal protein, 319
- Agglutinin, wheat germ, histidine determination in isolectins by X-ray diffraction analysis, 453
- AIR, G. M. (see also LAVER, W. G.), 339
- Alfalfa mosaic virus (see also Virus), 525, 545
- Amino acid activation in crystalline tyrosyl-tRNA synthetase from *Bacillus stearothermophilus*, 489
- 9-Aminoacridine binding to deoxydinucleoside phosphates of defined sequence: preferences and stereochemistry, 785
- ANDERSON, D. M., SCHELLER, R. H., POSAKONY, J. W., McALLISTER, L. B., TRABERT, S. G., BEALL, C., BRITTEN, R. J. & DAVIDSON, E. H., Repetitive sequences of the sea urchin genome. Distribution of members of specific repetitive families, 5
- Antigenic drift, mechanism in influenza virus; amino acid sequence changes in an antigenically active region of Hong Kong (H3N2) influenza virus hemagglutinin, 339
- aroH*, the structural gene for the tryptophan-repressible 3-deoxy-D-arabino-heptulosonic acid-7-phosphate synthetase of *Escherichia coli*, structure and regulation, 47
- ASHTON, F. T. (see also PEPE, F. A.), 421
- Bacillus stearothermophilus*, amino acid activation in crystalline tyrosyl-tRNA synthetase, 489
- Bacteriophage lambda DNA maturation; the functional relationships among the products of genes *Nu1*, *A* and *FI*, 375
- Mu, early polypeptides synthesized in minicells of *Escherichia coli*, 165
- — structural polypeptides and products of late genes; characterization and functional aspects, 139
- P4 mutants that are defective in the suppression of transcriptional polarity, 29
- P22 tail spike protein, temperature-sensitive mutants blocked in the folding or subunit assembly; active mutant proteins matured at 30°C, 633
- — — — — inactive polypeptide chains synthesized at 39°C, 653
- particles, filamentous; helical symmetries, 611
- T4 mutator DNA polymerase, new, selection and characterization; studies on the biochemical basis of mutation, 677
- T4-coded gene 32 protein, interactions with nucleic acids; binding properties of two specific proteolytic digestion products of the protein (G32P\*I and G32P\*III), 123
- — — — — characterization of the binding interactions, 75
- — — — — specificity of binding to DNA and RNA, 105
- BALDWIN, R. L. (see also JULLIEN, M.), 265
- BANDYOPADHYAY, P. K., WU, F. Y.-H. & WU, C.-W., Local mobility of the *lac* repressor molecule, 363
- BARALLE, F. E. (see also PARTINGTON, G. A.), 463
- Base modifications in tRNA<sup>Trp</sup> precursors; RNA processing in microinjected *Xenopus* oocytes, 405
- BEALL, C. (see also ANDERSON, D. M.), 5
- BECKER, A. (see also MURIALDO, H.), 375

- Dynamics of metmyoglobin crystals investigated by nuclear gamma resonance absorption, 825
- EcoRI* restriction endonuclease-DNA complex, preliminary X-ray diffraction studies, 607
- Electron microscopic investigation of the structure of Alfalfa mosaic virus, 545
- microscopy, immune: localization of ribosomal proteins S3, S6, S8 and S10 of *Escherichia coli* on the external surface of the small subunit, 193
- transport rates and  $^{13}\text{C}$  nuclear magnetic resonance spectroscopy; lysine to  $^{13}\text{C}$ -labeled homoarginine conversion in microbial cytochromes *c*, 583

- Escherichia coli*, ribosomal proteins S3, S6, S8 and S10 localized on the external surface of the small subunit by immune electron microscopy, 193
- polypeptides encoded by the early region of bacteriophage Mu synthesized in minicells, 165
- tryptophan-repressible 3-deoxy-D-arabino-heptulosonic acid-7-phosphate synthetase, structure and regulation of its structural gene, *aroH*, 47
- FEISS, M. (see also MURIALDO, H.), 375
- Ferredoxin-NADP<sup>+</sup> oxidoreductase structure and the location of the NADP binding site, 441
- FI (see also Genes), 375
- FIFE, W. L. (see also MURIALDO, H.), 375
- Filament, myosin; changes in internal structure along the length of the filament, 421
- Filamentous phage particle symmetries, 611
- FINCH, J. T., BROWN, R. S., RHODES, D., RICHMOND, T., RUSHTON, B., LUTTER, L. C. & KLUG, A., X-ray diffraction study of a new crystal form of the nucleosome core showing higher resolution, 757
- FINCH, J. T. (see also BENTLEY, G. A.), 771
- Folding kinetics of the bovine pancreatic trypsin inhibitor derivative RCAM(14-38), the role of proline residues, 265
- protein, effect of proline residues, 251
- FROLOV, E. N. (see also PARAK, F.), 825
- Fusions, genetic, that place the lactose genes under histidine operon control, 697
- Gene 32 protein, bacteriophage T4-coded, interactions with nucleic acids; binding properties of two specific proteolytic digestion products of the protein (G32P\*I and G32P\*III), 123
- — — — —; characterization of the binding interactions, 75
- — — — —; specificity of binding to DNA and RNA, 105
- 43 amber and temperature-sensitive mutants, mapping, 688
- , *Xenopus laevis*  $\alpha$ -globin; isolation, 463
- Genes, late, of bacteriophage Mu, structural polypeptides and products; characterization and functional aspects, 139
- *NuI*, *A* and *FI*, the functional relationships among their products; bacteriophage lambda DNA maturation, 375
- Genetic analysis of the histidine operon control region of *Salmonella typhimurium*, 713
- fusions that place the lactose genes under histidine operon control, 697
